

FOI Request dated 26/03/2024

Request Reference:

Request –

- *How much solar energy the university uses per year*
- *How many solar panels the university has across all campuses*

Response

- How much solar energy the university uses per year – in the year 2022/23 the University consumed 205,529kWh of solar PV generated energy on main campus and 38,422kWh off campus.

- How many solar panels the university has across all campuses – the University currently has 6 rooftop PV arrays, 5 on campus and 1 off. On campus arrays amount to a total of 258kWp of installed capacity with a further 40kWp installed off campus.
